**Board of the NAMA Facility**

**BMU / DECC**

**Subject:** Commitment NAMA-FACILITY.

Dear Sirs:

Fundecooperación for Sustainable Development is a nonprofit organization committed with the improvement of the socio-productive, environmental and gender equality conditions of small and medium producers in Costa Rica. Fundecooperación promotes sustainable development by supporting sustainable agriculture and resilient to climate change, gender equality, sustainable energy and energy efficiency, among others. For this reason, it has been active in the conceptualization of the NAMA-coffee of Costa Rica, its strategic definition and set up.

The organization reaffirms its support to the NAMA-coffee of Costa Rica, especially the NAMA-FACILITY proposal denominated "NAMA Low Carbon Coffee Costa Rica", by facilitating funding leverage from national financial and credit programs and the mobilization of U.S. \$ 400,000.00 reimbursable funds from our credit program "Taylor-made Credit" for the implementation of technologies that will allow the coffee producers to have production systems more efficient, more competitive and especially low carbon. Also, Fundecooperación is the implementing agency of the proposal called "CR-M1020 - Promoting low carbon growth in the Costa Rican coffee industry" financially supported by the IDB-MIF, a proposal of around \$ 1,000,000.00 (one million dollars) that could be used as counterpart.

Fundecooperación has wide experience in managing grants and reimbursable funds, and it has implemented more than 300 projects at the national and international level (eg, a South-South cooperation program among Benin, Bhutan and Costa Rica). The organization not only supports financially but also brings technical assistance to micro, small and medium producers and supports sustainable economic and innovative activities, such as the NAMA-coffee of Costa Rica.

Best regards,

Marianella Feoli,

**Executive Director**

**Fundecooperación para el Desarrollo Sostenible.**
