## NS-37 - Revitalization of the Existing Small Hydropower Plants and Construction of New Small Hydropower Plants (SHPPs)

## Serbia

## NAMA Seeking Support for Implementation

|                                      | A Overview   |  |
|--------------------------------------|--|--|
| A.1 Party                            | Serbia   |  |
| A.2 Title of Mitigation Action       | Revitalization of the Existing Small Hydropower Plants and<br>Construction of New Small Hydropower Plants (SHPPs)  |  |
| A.3 Description of mitigation action | The NAMA involves construction of 9 new small hydropower<br>plants (HPP) throughout Serbia. The total capacity of 9HPP is<br>30.40 MW with possible electricity production of 108.3 GWh/<br>year. All of the electricity generated will be supplied to the<br>Serbian electricity grid, which is currently composed mostly of<br>carbon-intensive lignite-fired thermal power plants. The NAMA<br>will contribute to climate change mitigation as the hydro power<br>as renewable energy source does not emit any greenhouse gases<br>(GHGs) during operation, and reduces GHGs that would<br>otherwise be emitted from grid-connected power plants in the<br>absence of the mitigation action. The project consists of two<br>phases: Phase I: Construction of 6 small scale hydropower plants<br>in the area of existing hydro facilities Phase II: Construction of 3<br>small scale hydropower plants in the new locations. |  |
