

S-186 - UNDP MDG Carbon

All

Information on Support Available

A Source of Support

A.1	Support title	UNDP MDG Carbon	
A.2	Support description	<p>UNDP MDG Carbon is an innovative programme to harness the resources of the carbon market in order to bring long-term sustainable development, at scale, to wide range of developing countries. Since its launch in 2007, MDG Carbon has assisted developing countries in implementing a host of low-carbon interventions, spanning multiple technologies, active in all regions of the world, and leveraging significant sums in private-sector co-investments.</p> <p>The programme has been providing comprehensive project development services for clients in developing countries. Starting with an exclusive focus on project-based and programmatic CDM, the programme has shifted its focus to sector wide approaches, in particular Nationally Appropriate Mitigation Actions (NAMAs), targeting countries in Africa and Asia-Pacific.</p> <p>MDG Carbon provides targeted technical and financial support for the detailed design of a NAMA Design Document, so that the programme will be ready for implementation once funding is secured. MDG Carbon does not fund the implementation of NAMAs.</p> <p>Please find more information about UNDP MDG Carbon at www.mdgcarbon.org</p>
