

Philippines Submission

Suggested Topics in line with the Scope of the Sharm El-Sheikh Mitigation Ambition and Implementation Work Programme to be discussed at the 2024 Global Dialogues

05 February 2024

The Philippines submits its suggested topics for the 2024 Global Dialogues on the Sharm El-Sheikh Mitigation Ambition and Implementation Work Programme as referred to in decision 4/CMA.4:

1. Identify and prioritize mitigation activities and strategies with high adaptation benefits
 - Exploring and integrating synergies of climate change mitigation and resilience-building;
2. Advancing green cooling
 - Advancing efficient, climate and ozone friendly refrigeration and air-conditioning (RAC) technologies and equipment (leap frogging technologies) integrating and enhancing the initiatives under Montreal Protocol's Kigali Amendment
 - Enabling market structures, availability and accessibility to green cooling technologies to support global transition
3. Advancing sustainable low and zero carbon technologies and processes in high emitting industries
 - Integrating sustainability and circularity measures through sharing of best practices and transfer of technologies in high emitting industries like cement, chemicals, iron and steel
4. Accelerating scale-up of renewable energy
 - Focus on addressing barriers and challenges related to cost and investments especially in developing countries to support transition to clean energy
5. Advancing collaborative research and development, knowledge sharing and scientific and technological innovations on low emission development strategies and measures
6. Enabling technology development and transfer and capacity building at the subnational levels, including convergence with private sector and academia for locally-led, evidence-based, and growth potential-driven innovation strategies for climate change mitigation and adaptation

For the UNFCCC Secretariat and co-facilitators' consideration.
