

## **SUBMISSION BY THE REPUBLIC OF INDONESIA**

Pursuant to the conclusion adopted by the Subsidiary Body for Scientific and Technological Advance at its forty-fourth session in May 2016 particularly agenda item 6(b), the Government of the Republic of Indonesia herewith submits its view on Advice on how the assessments of the IPCC can inform the global stock-take.

Indonesia is of the view that the assessments of IPCC should:

- 1) be independent and inclusive;
- 2) address the challenges of imbalance representation between regions and between developed and developing countries, both in the priority areas and scientists involved;
- 3) be more effectively communicate the progress to policy makers and other stakeholders, including through enhancing dialogue between scientists and policy makers;
- 4) ensure sufficiently cover elements in Paris Agreement and its implementation;
- 5) ensure sufficient time from the publication of the report until the completion of the global stock-take.
